PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full-stack development, algorithms, and database systems. Skilled in C++, Python, Java, and SQL with strong knowledge of object-oriented design, data structures, and debugging. Built projects using web tech, MongoDB, and machine learning. Comfortable in Linux, Agile workflows, and Git. Passionate about solving real-world problems through clean, scalable code.

EDUCATION

New Jersey Institute of Technology
Bachelor's computer science

Jan 2022 - Dec 2025
GPA:3.165

Hudson County Community College
Associate's computer science

Jan 2020 - Dec 2022
GPA:3.7

CERTIFICATIONS

- NSLS Leadership Certification
- 3rd Place – Senior Capstone Project Showcase, NJIT
- Student of Dean's List

SKILLS

Languages: C++, Python, Java, C, SQL, HTML/CSS, JavaScript, PHP, Bash

Tools/Frameworks: Git, GitHub, MongoDB, Unity (C#), BeautifulSoup, scikit-learn, Jupyter, VSCode

Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Agile, Debugging, Linux CLI

PROJECTS

Netflix Landing Page Clone (HTML, CSS, JavaScript): Recreated the Netflix homepage with responsive layout and styled components. Focused on visual fidelity and clean HTML/CSS structure.

15-Puzzle Solver (C): Engineered an A* search-based solver with Manhattan Distance heuristic, achieving optimal pathfinding performance in complex state space environments.

Stock Tracker (Python, BeautifulSoup, PHP, MongoDB): Scraped live stock data and built a MongoDB-backed dashboard using PHP to track price changes in real time. Designed for lightweight server-side rendering.

Advanced Database System (PL/SQL, JSON, XML, MongoDB): Designed schemas and developed robust queries for academic data transformation and analysis using PL/SQL and NoSQL tools.

3D Game Projects (Unity, C#): Developed multiple 3D games using Unity. Final project featured advanced animation blending and inverse kinematics for realistic character movement.

Credit Card Categorization (Python, scikit-learn): Built models to classify customer credit types using KNN, Decision Tree, and Naive Bayes. Evaluated models using precision, recall, and confusion matrix.

Restaurant Website (HTML, CSS): Designed and built a multi-page restaurant website with sections for menu, contact, and hours. Practiced layout, typography, and responsive styling.

EXPERIENCE

Uber Food Delivery Driver

New Jersey, USA Feb 2023 - Present

- Managed real-time route planning and issue resolution in a fast-paced, customer-facing role

Dunkin' Shift Leader

West New York, NJ, USA Jan- 2020 - Dec- 2022

- Supervised store operations and resolved customer issues to improve team workflow and satisfaction
- Delegated tasks and trained new team members in standard procedures

Hudson County Community College Enrollment Assistant

Jersey City, NJ, USA Mar 2022 - June 2022

- Helped 100+ students with admissions & transcript issues; maintained accurate records
- Delivered clear communication across in-person and phone interactions
